

The Los Angeles Trust for Children's Health

Putting the care in student healthcare

The L.A. Trust School Health Policy Roundtable

Mission: Advance collaborative policy solutions that help LA County schools unlock students' full potential by building integrated, youth-centered systems of support for whole child, school, and community wellbeing.

2022-24 policy goals

Goal #1

Expand school-based peer-to-peer programs for behavioral health support across LA County.

Goal #2

Enable LA County schools to establish integrated systems of support for whole child wellbeing through implementation of the CA Community Schools Partnership Program.

Goal #3

Advocate strategic implementation of the Children & Youth Behavioral Health Initiative in LA County to establish integrated, youth-driven systems of care in schools.

\$4 Billion

AB 2083: Children and Youth **System of Care**

The L.A. Trust School Health Policy Roundtable

We're working to ensure transformative investments in school health go toward building integrated, youth-centered systems of care that help LA youth succeed in school and life.

Goal #1

Expand school-based peer-to-peer (P2P) programs for behavioral health support across LA County.

We ♥ peer-to-peer because...

- 1. Young people are asking for it!
- 2. Enhances protective factors and resiliency
- 3. Culturally responsive and adaptable model
- 4. Mitigates the provider shortage (resource light)
- 5. Creates workforce pipeline for youth

Opportunities

- Leverage recent one-time investments and ongoing funding sources to expand P2P
- Embed P2P in LA's emerging Community Schools
- Designate P2P facilitation and support as duties of BH Coach (CYBHI)
- Engage youth leaders in local advocacy with schools

Goal #2

Enable LA County schools to establish integrated systems of support for whole child wellbeing through implementation of the CA Community Schools Partnership Program (CCSPP).

California's investing \$4.1 billion to grow Community Schools

- Nearly \$105 million granted to LA County schools in 2022 (round 1)
- Grants will help connect students/families to valuable local resources
- Integrated Student Supports pillar ensures student access to health care
- All 4 pillars work together to support whole child wellbeing

Opportunities

- The L.A. Trust partnering with LACOE to seek CCSPP Regional TA Center contract
- Build infastructure for authentic student and family engagement
- Grow movement for healing-centered schools through communities of practice
- Enhance data collection and evaluation to advance equity

Goal #3

Advocate strategic implementation of the Children & Youth Behavioral Health Initiative to establish integrated, youth-driven systems of care in schools across LA county.

\$4.4 billion to transform youth-serving behavioral health systems

We're tracking 4 school-based workstreams

- School-linked Partnership & Capacity Grants (~\$150 million for LA County)
- Statewide School-linked Fee Schedule
- Behavioral Health Coach
- Student Behavioral Health Incentive Program (~\$125 million for LA County)

Opportunities

- Leverage diverse Roundtable expertise to develop implementation recommendations
- Rethink and redeploy existing resources to sustain one-time investments
- Advance local policies that facilitate successful CYBHI implementation (healing-centered schools)
- Use investments to drive integration between mental health and other student supports

2022-2023 Action Plan

Goal #1

Expand school-based peer-to-peer programs for behavioral health support across LA County.

Goal #2

Enable LA County schools to establish integrated systems of support for whole child wellbeing through CA Community Schools Partnership Program implementation.

Goal #3

Advocate strategic implementation of the Children & Youth Behavioral Health Initiative to establish integrated, youth-driven systems of care in schools across LA county.

Shared objectives

Objective 1.1/2.2 (Peer support & Community Schools)

By December 2022, develop and execute engagement plan with LA County CCSPP grantees to understand current school practices, plans, and needs around whole school health integration and peer-to-peer programming.

Objective 2.1/3.1 (Community Schools & CYBHI)

By October 2022, send letter to the LA County Board of Supervisors describing need for county-level coordination of resources and partnerships to support implementation of initiatives to support school and student health.

Objective 1.2

By June 2023, produce toolkit that guides schools in establishing peer-to-peer programs.

Objective 1.3

By 2024, convene and prepare group of student leaders to uplift the value of peer-to-peer within their school boards and school communities.

Objective 2.3

By February 2023, develop framework for implementing and evaluating integrated, youth-centered systems of support for student wellbeing to be taught by TA hubs.

Objective 2.4

[dependent on objective 1 outcome] Facilitate formation of a Community Schools Task Force to develop collaborative vision for scaling Community Schools countywide.

Objective 3.2

By October 2022, develop recommendations for the School-linked Capacity Grants, All-payer Fee Schedule, and BH Coach workstreams and deliver to state agencies.

Objective 3.3

By February 2023, conduct analysis [or seek Board-directed analysis] of local investments in school-based behavioral health and determine what can be better leveraged to sustain CYBHI investments.

Roundtable timeline

Year 1 | December 2021 – December 2022

If you share our priorities, please contact Gabby to discuss potential collaborations.
