- Full MediCal program access including FAMPACT (Title 10 funding)
- Limited MediCal program access; CHDP (EPSDT)
No access to FAMPACT
- Limited MediCal, EPSDT, and
- Regained access to FAMPACT

In Retrospect.....

- Strategies that Work

- Pick a kid-friendly partner. Planned Parenthood understands youth issues and has established youth –centered programs.
- Use teens to outreach to their peers. Teens know what other teens want/need and they know what techniques work to get kids interested in coming into the clinic.
- Pick a “Teen-Friendly” Staff. Adolescents are intuitive—they know when providers and clinic staff are judgmental and/or not caring about their issues no matter how minuscule they may appear.
- Engage your school administration/school staff. Make them feel that they are Included when making decisions for the clinic that will impact the school

- Challenges to Overcome

- School District Policy/Politics
- School Policy/Politics
- Personnel/Personal issues
- Funding issues
