LAUSD CHDP PROGRAM

The Michael Godfrey School Based Health Clinic

Murchison Street Elementary School
1501 Murchison Street, Los Angeles, CA 90033
Child Health and Disability Prevention

- CHDP is a preventive health program serving children, siblings, and youth up to 18 years of age. Our target population is 1 year through 18 years of age.

- CHDP is a financial need based program that makes early health care available to children with health problems as well as to those who seem well.

- Eligible children can receive periodic preventive health assessments and referrals with free follow-up care when indicated.

- Basic to the program is the concept that many physical and mental disabilities can be prevented, or their impact lessened, with early recognition and treatment of defects.
CHDP

- LAUSD is the largest school district CHDP provider in the state.

- We presently have 18 school nurse practitioners offering CHDP services in two ways:
  - At permanent school clinic sites
  - Selected elementary schools on a scheduled basis during the school year.

- We have 5 School Physicians providing CHDP services at clinic sites.

- Recent improvements to the program now allow children to pre-enroll for temporary full-scope Medi-Cal. It is a “Gateway” into permanent Medi-Cal and Healthy Families coverage.
CHDP School Based Health Clinics
